

That viewpoint has won general acceptance, although there are some who still disagree with it. Dr. Davis said. Many of the specific policy recommendations also are being put into effect, although not necessarily as a result of the 1953 report, he said.

In succeeding studies on skilled manpower, on work skills and on manpower, the council has gone back into the problems of scientific and professional personnel. The new work has enabled it to see the old problems with new insights and to discover and pursue new problems not apparent five years ago, Dr. Davis said.

Cultural Level Cited

"Those who reach a conclusion about the Soviet Union's technological personnel on the basis of the number of engineers they graduate every year compared with ours never look at the total supply we have in being or at the cultural level we have attained for broad masses of people," he said.

"Our problem is not to develop personnel in order to multiply the numbers who can build bigger and bigger Sputniks. We need a development program with built-in flexibility for adaptation to the needs we will have when rocket-powered satellites are obsolescent, so that we can achieve a balance among all our needs."

"There is an enormous gain in keeping our choices open so that our people can apply their capacities, competences and creativeness to the new opportunities that progress in science and technology is always presenting."

The council, which was established in 1951 under a grant from the Ford Foundation is now studying manpower development and utilization from two viewpoints. One is the government and manpower. The other is the complex of problems involved in the waste of manpower resources.

Five Beautiful Ways to Tell Time . . .

Imported Precious-Look Timepieces by Sheffield

Imported clocks with simple, expensive-looking designs in a richly polished brass . . . ideal for home or as hostess and wedding gifts.

Large wafer-thin clock with contemporary design face. Raised hour markers on white face. 6" diameter. Alarm setting. 10.95

REVIEW OF C.I.A. URGED

Bridges Asks Study of Plans for Nixon's Trip South

WASHINGTON, May 17 (UP)—Senator Styles Bridges of New Hampshire proposed today that a Senate subcommittee review operations of the Central Intelligence Agency in the wake of Vice President Richard M. Nixon's tour of South America.

As a top Republican member of the Senate Armed Services Committee, Mr. Bridges serves on the subcommittee that oversees the agency's work.

Charges of ineptitude were made against the C. I. A. in the fever that followed student riots and anti-United States demonstrations on the Vice President's trip. Senator Bridges recommended that the subcommittee look into the agency's advance preparation for Mr. Nixon's tour.

Delicate miniature bell alarm. Radium hands and hour dots on a silver toned face. 3 1/2" high. 8.95

Cheerful round clock in a four poster setting with curved top. Silver toned face with radium hands and hour dots. Alarm setting. 4 1/2" high. 16.95

Raised face clock set in four fluted posts. Silver toned face with center design in golden color. Radium hands and hour dots. Alarm setting.

Four fluted posts with alarm clock in center. Radium hands and hour dots on silver toned face. 4" high. 9.95
